

# Abstract

The invention relates to a liquid crystalline medium based on a mixture of a first compound having a positive dielectric anisotropy which is defined at least by compound of the formula I:

and at least one compound of the formula II:

in which

$R^{11}$ ,  $R^{12}$ ,  $R^{21}$  and Z are as defined in Claim 1,

and the use thereof for an active matrix display based on the ECB or IPS effect.
